

Fast Facts: Graduate Certificate *Occupational Health*

COLLEGE OF HEALTH
AND HUMAN SERVICES
THE UNIVERSITY OF TOLEDO

Graduate Certificate in *Occupational Health*: The curriculum of the 15 credit-hour program will benefit those with applicable education and experience that intend to take the Certified Industrial Hygienist (CIH) examination. The curriculum incorporate the general areas of science, technology, management and communication within the context of the courses. The curriculum offers enough flexibility to assure that students may select courses that best meet their professional needs.

Course Delivery: The graduate certificate program is very accessible to individuals who want additional academic education and training at the graduate-level. All courses are offered via a combination of conventional classroom, laboratory (if applicable), and Web-based modes. Required on-campus sessions at the UT Health Science Campus (former Medical University of Ohio) are offered either weeknights (i.e. 5:15 pm-9 pm) or on Saturdays (i.e. 8:15 am-12 pm or 12:45 pm-4:30 pm). Each course during the term offered, typically requires meeting on-campus 8 sessions per term (on alternating weeks) plus completion of off-campus Web-based modules. The courses required for the certificate program are already offered as part of the curricula for the ASAC-ABET accredited 40 credit MS Occupational Health (MSOH). Credits may be applied toward the degree programs, depending on major, for those who continue advanced study beyond the certificate.

15-credit <i>Occupational Health</i>	
Courses	Credits
